Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (USPN 6350209 B1).

Chen teaches a method of making a gold club head comprising preparing a metal casing (20) with an open end, seating a striking plate (30) in the end of the casing and binding the parts through a brazing material placed in the area between them. The brazing material melts and flows by capillary action (figure 7, col 2 lines 10-53 and col 3 lines 7-23).

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Shieh (USPN 6299549 B1).

Shieh teaches a method of making a gold club head comprising preparing a metal casing (10) with an open end, seating a striking plate (20) in the end of the casing

and binding the parts through a brazing material placed in the area between them. The brazing material melts and flows by capillary action. The braze material melts at a lower temperature than the plate and casing (figures 5-8, col 2 line 40 – col 3 line 7 and claim: 1).

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Huang (US 2005/0181890 A1).

Huang teaches a method of making a gold club head comprising preparing a metal casing (10) with an open end, seating a striking plate (20) in the end of the casing and binding the parts through a brazing material placed in the area between them. The brazing material melts and flows by capillary action. The braze material melts at a lower temperature than the plate and casing (figures 1, 2, 5, paragraphs 4 and 26-31).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

5. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al. (US 2005/0049074 A1).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Oldham (USPN 1968092), Liang (USPN 6183377 B1) and Huang (US 2004/0147341 A1).
